CHARGER SPECIFICATIONS

Input: DC 5V 2A (Max.)

Output: DC4.2V / ---1.0A*2

Size: (L)168*(W)48*(H)25.4mm

Weight: 252g

LED Charging Indicator:

- ✓ Red LED: charging in progress.
- ✓ Green LED: charging fully completed.

FLASHLIGHT MAINTENANCE

1. Please keep the battery positive pole (+) towards the flashlight head (The LED direction).

2. recommends using only quality batteries. If the light will not be used for an extended period, remove the battery to avoid damage from electrolyte leakage or battery explosion.

3. Long-term use can result in O-ring abrasion. Check the condition of O-rings every time you open the body of the light. Replace the ring with an approved spare to keep the light properly sealed against water.

4. Please clean the contacts of your light periodically to keep the light performance good, especially when the light flickers or does not light up. There are probably several reasons for a flickering or a non-functional light may be due to the following.

Reason A: The battery need to be replaced.
Solution: Replace battery (Pay attention to the +/- orientation of the battery).

Reason B: The threads, PCB board contact or other contacts are dirty.

Solution: Clean the contact points with a cotton swab soaked in rubbing alcohol. If the above methods do not work, please refer to the warranty policy and contact us for customer service. and contact us for customer service.

Danger:

Never point the flashlight into your eyes or the eyes of other people otherwise it may cause your eyes to be seriously injured or even possibly blind
